Warrior Centric Population Health™

A platform that makes Best-Practice Population Health Management achievable.

How does it work?

Through **WARRIORHUB™** a single Azure-Based Portal, facilities access everything they need to implement best-practice population health management targeted specifically to reduce Warrior Community health disparities.

EXECUTIVES & ADMINISTRATORS analyze, benchmark, and track Warrior Community demographics, health determinants, and outcomes through **WARRIORMARK™**, WCH's proprietary data machine. **USERS MANAGE THEIR EXPERIENCE.**

CLINICIANS AND STAFF receive vital education & training through **WARRIOR-CENTRIC HEALTHCARE TRAINING™.** Exclusive e-learning modules are all CME/CE accredited to fit into clinicians' continuing education requirements. **LEARNERS MANAGE THEIR TRAINING.**

COMMUNICATIONS STAFF access all the content they need to reach out to current and prospective Warrior Community patients through **WARRIORCOMM™**, an always-on pipeline of culturally relevant and clinically important communication materials facilities can distribute through owned and bought media. **COMMUNICATORS MANAGE THEIR COMMUNICATIONS.**

WARRIORCentric
Health™

All three necessary toolsets available 24/7 through a single Azure-based portal

WarriorMark™
➤ **Exclusive Data Analytics**

Warrior-Centric Healthcare Training™
➤ **Exclusive Education**

WarriorComm™
➤ **Exclusive Outreach Content**
